GLASS SEALER

TECHNICAL DATA SHEET

GLASS SEALER is an incredible new protective sealant that protects all types of glass surfaces by providing a hydrophobic coating that is water, soil and stain resistant.

GLASS SEALER eliminates hard water build up, mineral deposits, soap scum, dirt, grime and bacteria which can live in the microscopic hills and valleys that are present in normal glass surfaces. It seals the pores in the glass surface and also provides scratch and abrasion resistance.

GLASS SEALER is a low viscosity, clear liquid which can be easily applied to glass using a micro fiber cloth or terry towel. It can also be used to seal porcelain, ceramics, plastics, fiberglass and polished metals. The coverage rate on glass is approximately 20sf per ounce or 320sf per gallon.

GLASS SEALER is highly effective in a wide range of residential, commercial, institutional and industrial applications including;

Bathroom Shower Doors and Mirrors.

Ceramic and Porcelain Tiles.

Kitchen Ceramic Stovetops, Oven and Microwave Doors.

Automotive Windshields, Headlamps and Sunroofs.

Marine and RV glass surfaces.

Exterior Glass Windows and Doors of Buildings.

APPLICATION PROCEDURE

Clean the glass surface thoroughly with Stone Soap RTU applied with a micro fiber cloth or terry towel. If the surface has calcium build up remove it with Eco Calcium Remover and then rinse thoroughly. Spray Glass Sealer on to the surface to be treated in small areas and rub vigorously in both vertical and horizontal directions for 1 to 2 minutes then move to the next small area. Allow to cure for 12 hours. Do not use alternative cleaners such as Windex® as they may damage the Glass Sealer.

PRODUCT FEATURES

- Maximum Protection and Preservation of Glass.
- Keeps the natural look of Glass.
- Reduces Cleaning, Maintenance and Replacement.
- Retards Bacteria Growth on the Glass Surface.
- Provides Water & Stain Resistance and Eliminates Soap & Scale Build Up.
- Increases the life of Glass Surfaces.
- Improves Visibility, Scratch & Abrasion Resistance.

SHELF LIFE

In the original container the product will have a shelf life of at least 12 months. Always protect this product from freezing.

TYPICAL PROPERTIES

Flash Point	:	53F = FLAMMABLE LIQUID
Appearance	:	Clear Liquid
Odor	:	Alcoholic
Specific Gravity	:	0.79 g/ml
Compatibility	:	Do not mix this product with any other chemicals.

PACKAGING

This product is available in the following containers;

- 4 ounce spray bottle
- 1 pint spray bottle
- 1 quart spray bottle
- 5 gallon plastic pail
- 55 gallon plastic drum

SHIPPING

This product is shipped under the limited quantity exception, DOT shipping regulations 49 CFR HM-215K in containers less than 1 quart by Fedex Ground or USPS parcel post. Larger size containers ship as a flammable liquid by a common carrier that we select unless otherwise requested by the customer.

SAFETY

Before handling this product always read the Material Safety Data Sheet and container labels for physical and health hazard information. The information contained in this technical data sheet is, to the best of our knowledge, true and accurate. No warranty, expressed or implied, is made or intended. The use should be based upon the customer's own investigations and appraisal.
