

ECO PAINT & SEALER STRIPPER

A specially formulated concentrated stripper which removes all types of sealers and paints from concrete, masonry, brick, wood, steel, aluminum and metal alloys.

Directions: **Eco Paint & Sealer Stripper** is a ready to use product which must be mixed with a drill mixer until it is a creamy consistency (approx one min/gal). It can be applied with a roller, brush or airless sprayer at 50-90°F. The product should be applied at twice the thickness of the coating that is being removed. It must not dry out during the stripping process so it is recommended that it is covered with a plastic sheet. The coating is normally stripped in 2 to 4 hours but it can be significantly longer (up to 36 hours) for coatings with multiple layers. After stripping the coating can be removed using a scraper, squeegee, shop-vac or a >3000 psi pressure washer. Coverage rate will vary depending on the substrate and coating thickness but 50 to 100 sf/gal is typical.

1. FIRST AID:

Eyes – Flush with cool water for at least 15 minutes. Call a physician.

Skin - Wash thoroughly with soap and water. Call a physician.

Ingestion – Call a physician. Never give anything by mouth to an unconscious person.
