

DISTRIBUTORS *WANTED*

Stone Technologies Corp., Manufacturer of High Quality Stone Sealers, Enhancers and Cleaners is Seeking International Distributors For These and Other Fine Products:

Stone Sealer #1 (Natural Finish) is a reactive silicone polymer emulsion in odorless mineral spirits which impregnates the stone to form an invisible protective barrier.

Stone Sealer #2 (Natural Finish) is a reactive silicone polymer emulsion in water which impregnates the stone to form an invisible protective barrier without the release of any volatile organic compounds (VOC).

Stone Sealer #3 (Natural Finish) is a fluoropolymer emulsion in water which bonds with all types of stone surfaces to provide stain resistance and increased wear abrasion.

Stone Sealer #4 (Natural Finish) is a double strength reactive silicone polymer in a citrus based solvent which is biodegradable and occurs naturally in nature as the main component of orange peel.

Stone Sealer #5 ("Wet Look" finish) is a reactive silicone polymer in odorless mineral spirits that impregnates marble, granite, slate and limestone to form a "wet look" protective barrier.

Stone Sealer #6 ("Wet Look" finish) is a more environmentally friendly version of Stone Sealer #5. The sealer is water based with no solvents or VOC and is non-toxic and nonflammable.

Stone Soap Ultra is a highly concentrated water based cleaner used by the professionals which has been specifically formulated for all natural interior and exterior stone surfaces.
