October 21, 2010

After thermal imaging a customers home that was built over 100 years ago and finding heavy moisture pockets in the mortar and stone i needed to find a solution. After weeks of research and some sampling on concrete submerged in water tanks I found your product (Concrete Sealer X-3) to be by far the best. Not only did it repel the water as a mist,rain, but the concrete blocks that were submerged dried much faster than with other products.

I have another huge project and will be ordering your product as I no longer need to research products as I have found my solution.

I thank you for engineering a great product that is easy to use.
